SFO | serious fraud office

Our Ref: FOI2014-009   Date: February 2014

Subject: IT Software

This request asked:

Whether the Serious Fraud Office use IBM's database software DB2 for Linux, UNIX and Windows or z/OS?

Contact details of the decision maker responsible for database procurement.

Name of the outsourced data support provider.

The SFO runs multiple databases and these are specific to the operational areas.

All purchases are made through the Government Procurement Framework, internally these will be signed off by Mathew Mallett, the Chief Technology Officer.

Any databases that fall under an outsourced model are supported by the 3rd parties on site: Capita, Ravn and Autonomy.
