

Our Ref: FOI2016-117

Date: October 2016

Subject: Tesco investigation team

This request asked about the number of individuals who were involved in the Tesco investigation.

Staff information is held on an internal time recording system and collected for internal management purposes rather than as official data.

These records show that 53 members of staff have at some point recorded time against the case. This does not include external counsel from the independent Bar.

Records from the finance system show that one additional temporary staff member was also involved in the case at some point in some capacity.

This data includes those who may have only worked on the case for a very short period or who have since left the SFO and does not specifically identify any staff roles. It would therefore cover individuals involved in a wide variety of administrative support, legal or investigative roles.
